**New York Compensation Managers, Inc., joins forces with
HealthsystemsTM/Benescript Services®
to provide pharmacy benefits to its clients.**

Cicero, NY: Effective June 1, 2006, New York Compensation Managers, Inc., (NYCM) will be partnering with HealthsystemsTM/Benescript Services® to provide pharmacy benefits to its workers' compensation client base, which includes over 1500 New York State Businesses.

The HealthsystemsTM retail pharmacy network allows injured workers' enrolled in a self-insurance trust administered by NYCM to have their work related medications filled at a local pharmacy with **no out of pocket expense** and at a **discounted rate** below fee schedule.

As NYCM strives to increase its utilization of HealthsystemsTM to include initial prescriptions, the company has implemented a First Fill program. The First Fill program yields the following benefits:

- ❑ No out of pocket expenses for Injured Workers'
- ❑ Helps minimize the out of network pharmacies
- ❑ Ensure the policyholder network savings on the first fill and future prescriptions

Dispensing of medications for a new injury frequently takes place within hours after the injury occurs and before the first notice of injury has been fully processed. In these situations, Health**systems**[™] will allow the pharmacy to provide a ten (10) day supply to the injured worker.

The First Fill program provides NYCM the ability to electronically capture, process, and adjudicate an Injured Worker's first prescription drug claim.

For more information on this partnership between NYCM and Health**systems**[™]/Benescript Services®, please contact

Chris Mason at 1-888-352-4456 or by e-mail at cmason@workerscomp.com
