

Featured Safety Solutions

The Plate Vise from Tri-Vise, LLC is a metal device used to hold pipe, wood, conduit, rebar etc. while you cut, tighten, weld, drill, or solder. This product is especially useful if you work alone on the jobsite and don't have an extra set of hands.

Simply stand the plate vise on the floor, or bench and place the material you are working with through the appropriate slot and the steel vise will hold what you are working on in place.

Applications - The plate-vise is a multi purpose tool that covers numerous applications

Electrical - Electricians will find the plate-vise to be a huge labor and time saver. Carry the portable vise to any work location. Cut up to four inch conduit with ease. Cut and drill shallow and deep unistrut easier than ever before.

Plumbing - Plumbers! No need to carry that heavy and expensive tripod vise. The Plate-Vise at approximately 4 pounds can do it all. Set up and solder fittings in any location. Cut and drill your unistrut racks with ease. Hook to your belt and carry to those hard to get to rooftop jobs.

Carpenters - You'll be amazed at the ease of cutting wood and keeping both hands on that power saw. Cut and drill 4x4's, 2x6's, 2x4's, 2x2's, and more. Make those miter cuts with ease.

Miscellaneous - The Plate-Vise has many different uses. It can be used for angle iron, square tubing, landscape logs, fence posts, and more. The vise will be a great asset for handymen, pool installers, fencing contractors, and more.

You can buy the Plate-Vise at your nearest Lowe's Store for \$19.97
